THE STORY OF GEVELOT

Gevelot is a name that has been known to stand for quality ammunition and firearms for well over a century. In fact, Gevelot was founded in France in 1820 meaning they will be celebrating their 150th Anniversary in 1970. This all adds up to the fact, that Gevelot is one of the oldest, largest, and best known ammunition manufacturers in Europe.

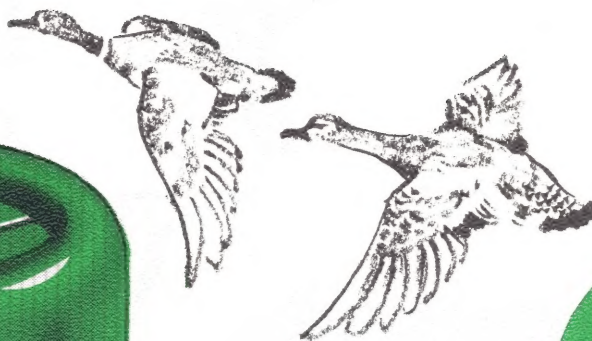

Gevelot expanded its operation to Canada in 1961, and since that time have continued to grow until they are now established as a definite force in the production of Sporting ammunition for the Canadian market.

Gevelot's quality control system, ballistics testing, patterning, pressure testing, and indeed every aspect of producing a quality shell, are exerted to assure you, the Canadian hunter, a truly fine product. Gevelot have not only established the "Olympic" shotshell as a necessary part of thousands of hunter's equipment, but have made great headway with the world famous line of Gevarm semi-automatic .22 rifles, until it is now probably the fastest selling semi-auto in Canada. Our line of .22 calibre ammunition is being used by greater numbers of plinkers and target shooters every year, and our Gevelot International Awards program is gaining popularity with more and more Boy Scout, 4-H Clubs, Service Clubs and Fish & Game shooting Clubs. Gevelot Centre fire ammunition, is now packed in a sensational new "Black Pack" box with a tough white cartridge caddy tray and this item alone is the talk of the industry.

All in all, Gevelot of Canada is on the upswing, and with the continued support of the multitudes of Canadian hunters, we look forward to years of progress with our great country Canada.

The 16 and 20 Gauge Olympic Long Range shot shells were introduced during the 1968 season in a tough new plastic tube. As with the big member of the family, the 12 Gauge, they met with instant popularity with hunters across Canada. Gevelot has built all the necessary features into the 16 and 20 Gauge that is so evident in the 12 Gauge. Olympic shells pack all the power necessary for shooting in all parts of Canada and you can be assured of peak performance with the whole Olympic line.

MODEL A-3

MODEL A-7

SELF LOADING RIFLES

MODEL A-6 22 CALIBRE 8 shot rimfire long rifle — annular percussion type — with movable breech adjusted to standard or high velocity cartridges. No firing pin — no extractor — fitted with calibrated rear sight and front sight. Easily dismantled and assembled. Barrel constructed of high resistant steel for maximum strength — Muzzle specially shaped to assure high precision firing. Complete with standard 8 shot long rifle clip.

AMMUNITION

Any good make of cal. .22 cartridges will function in .22 GEVARM rifles.

We however particularly recommend cal. .22 Long Rifle GEVELOT cartridges.

Note:- When firing High Velocity or very powerful cartridges it is advisable to increase the inertia of the breech bolt by reversing the position of the spring guide, i.e. by placing its rimmed-base end, in front, inside the rear-end cavity of the breech block.

● Note: Model A3 and A6 rifles Serial #200,000 and over will now take a 20 shot clip magazine.

GEVELOT

A FEW RULES OF SAFETY

Shoot with Confidence with
Olympic Shot shells

GEVARM

WHATEVER
YOUR
GAME,
USE
GEVELOT

- Always handle a gun as if it were loaded.
- Always carry your gun so that you are in complete control of the direction of the muzzle.
- Carry only empty guns taken down, or with action open, into camp, house, or boat.
- Be doubly sure of your target — never shoot at a sound — or brush movement.
- Always be sure that barrel and action are clear of obstruction particularly after a fall, or if gun has been dropped.
- Never point a firearm at anything you don't want to shoot.
- Carry your gun with the safety on — keep your finger away from trigger.
- Never leave a gun unattended unless you unload it first. Be sure it cannot fall.
- Unload gun before climbing a fence or obstacle, it only takes a few seconds, and could save a life.
- Never mix gunpowder and alcohol.
